

EISKRISTALL

After sixteen years of band history, the **first longplay album** with twelve tracks will be physically and digitally released on the Buehnenfall label on February 28, 2022. Six tracks by the duo **EISKRISTALL** from Bochum (Germany) are new recordings of works that appeared on a physical mini EP in 2011. The other tracks on the album were recorded in the studio for the first time.

The band can look back on a long live history with changing line-ups. **EISKRISTALL** has been working as a duo since January 2019 and is accompanied on tour by experienced live musicians. All pieces were composed and recorded by **La Sonnambula** and the musician **Tim Tucker**. The lyrics come from the pen of the singer La Sonnambula.

EISKRISTALL would like to use music to express any form of cold in society, in the world and beyond. This can depict the inside of a person, describe a lonely ice desert or reflect a cold steel silhouette of a big city on a foggy winter morning. Musically, this is expressed in dynamic song structures with catchy melodies and texts, some of which also deal with supernatural things, legends and personal life experiences.

The image of an ice crystal was chosen as a symbol and, so to speak, as a "sign of recognition", which also served as the inspiration for the name.
